

Yoked – Functional Requirements Document (FRD)

MVP Feature Set, Monetization & Growth Strategy

Overview

Yoked is a Christian relationship and marriage-oriented mobile application focused on intentional, faith-centered relationships for members of the Church of Christ and broader conservative Christian communities.

Vision Statement

To build the most trusted Christian relationship ecosystem where believers form spiritually aligned relationships that lead to healthy marriages and Christ-centered homes.

Target Audience

- Church of Christ members
- Christian professionals
- Marriage-minded singles
- Conservative Christian communities
- Diaspora believers

Core Philosophy

- Faith-first platform
- Serious relationships over casual dating
- Community accountability
- Trust through verification
- Scripture-aligned culture

Recommended Technology Stack

Frontend: React Native

Backend: Node.js + Express

Database: PostgreSQL

Authentication: Firebase Auth

Hosting: AWS or GCP

Messaging: Socket.IO

MVP Features

Authentication
